

We offer several ways of connecting guest devices to our TV system

Connect your Android device to the TV in your room using Miracast.

- Ensure that your android device is connected to the Hotel Wifi.
- When the TV turns on the Hotel welcome page will appear. Using your remote control move across to the 3rd Tab called **CONNECT MY DEVICE**.
- Again using the remote click on the **CONNECT** button.
- Many but not all Android devices have miracast inbuilt by default. If you click on the HELP button on screen it will give instructions as to where this application is likely to be on your Android Device.
- If you cannot find the application you will need to download the Miracast App from the Google Play store. This app is free.
- After clicking the **CONNECT** button and by using either the inbuilt Miracast or the downloaded app you just need to connect to the device as its called on the TV.

Connect a laptop/tablet/MacBook to the TV via a HDMI cable.

- If your device has a HDMI port in it you can connect to the HDMI port in the TV.
- Plug in the HDMI cable into the HDMI port on the TV and into the HDMI port on your device.
- When the TV turns on, the Hotel welcome page will appear.
- Using the remote scroll over to the 3rd tab called **CONNECT MY DEVICE**.
- Select the second option of the 3.
- If you click on the **SWITCH** button the TV source should change to HDMI and you can share the content on your device to the TV Screen.
